DISTRIBUTORS

62 years of history

It has now been more than 62 years since SAE Group built its first porous concrete tennis courts in Cenon (France), in the suburbs of Bordeaux, in 1964.

Since then, we have been working hard to improve the tennis quality and aesthetics of our courts. We innovate by creating new processes such as **CONFORT TEC®** (synthetic clay) surfacing and **AMBIANCE PADEL®** padel courts.

With our expertise in manufacturing fencing and sports equipment, we produce a complete range of robust and durable equipment in our metalworking workshops (all our products are hot-dip galvanized before being painted on our in-house powder coating line).

All these principles have earned us recognition as specialists in tennis (12.000 references, city stade®, 1800 references) for many years and now in padel.

Tennis court surface:
Synthetic
turf

« An attractive surface for
your leisure activities »

Synthetic turf - Country Club®

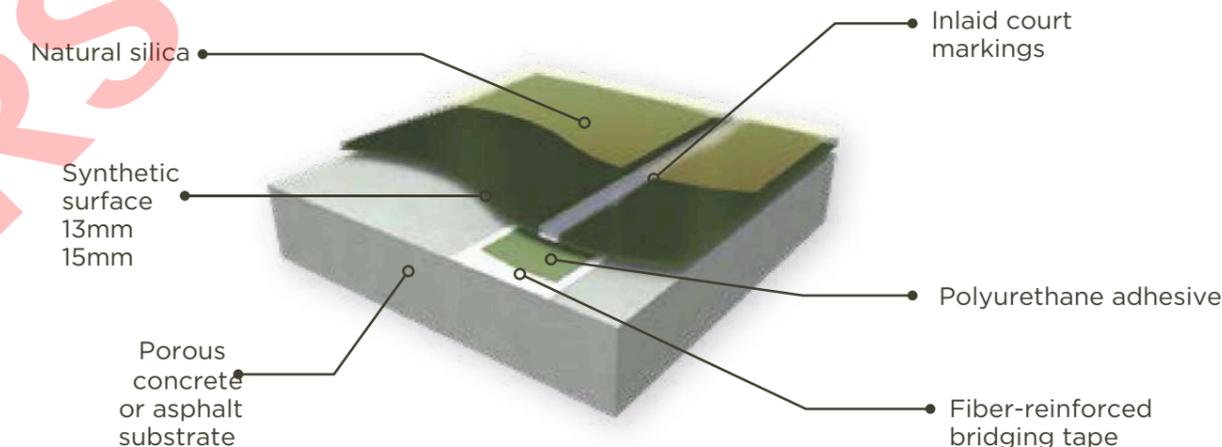

Country Club® synthetic turf is a 13 mm textured/semi-sanded synthetic turf **surface** made from 100% pure high-density polyethylene monofilament fibers. Treated with UV protection, it guarantees excellent durability and consistent performance in all weather conditions.

Installed independently of the substrate, it is weighted with natural silica, ensuring perfect cohesion, good permeability, and optimal playing comfort. It is ideal for tennis courts looking for a durable, high performance surface that is pleasant to play on.

Installation independent of the substrate

Synthetic turf - Country Club®

Textured semi- sanded turf

13mm textured/semi-sanded covering: Pure polyethylene fiber synthetic turf. High density textured. **UV-resistant treatment. Yarn weight : 8000 Dtex. Density : 71400pts/m2**

Installed independently of the substrate and weighted down with natural silica sand.

kit for 1 tennis court sold with line and accessories

Ref : **G13.36X18** (without silica) **8 698€HT/EXW**

Ref : **G13.36X18.S** (with silica) **9 980€HT/EXW**

Advantages du gazon synthétique Country Club®

- ✓ Comfort and glide in all seasons
- ✓ No ball effect
- ✓ Neutral bounce

Tennis court coating :
CONFORT TEC[®]
"Artificialturf"

« Comfort and glide
in all seasons »

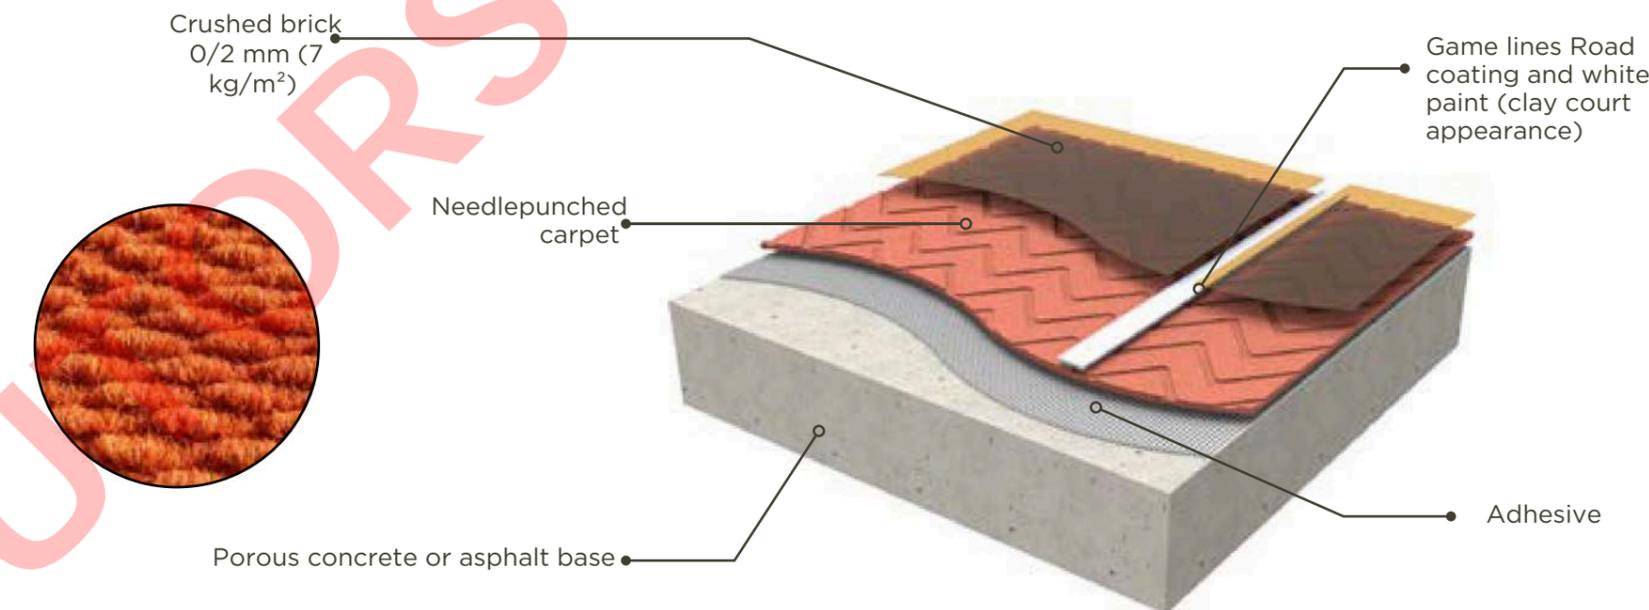

Artificial clay - **CONFORT TEC® CLAY**

CONFORT TEC® CLAY is a crushed brick tennis court surface laid on needle-punched carpet glued to a hard base. The court lines are painted before the crushed brick is added. This system is suitable for outdoor use with automatic watering (low water requirement) or indoor use with manual watering.

60

Artificial clay - **CONFORT TEC® CLAY**

🏆 Advantages of **CONFORT TEC® CLAY** coating

- ✓ Playable in all seasons
- ✓ Comfort
- ✓ Sliding effect

kit for 1 tennis court 36mx18m sold with line and accessories

Ref : KIT.MOQUETTE.B (regardless of the support) **12 131€HT/EXW**

Ref : KIT.MOQUETTE.BC (glued to backing) **15 000€HT/EXW**

Coating that needs to be moistened between games in summer

Annual maintenance to be carried out

- Passing the drag net and sweeping the lines to regulate the crushed brick, for greater playing pleasure.
- Regular removal of leaves.
- Replenishment of crushed brick (consumption 500kg/year).
- Repainting of lines for better visibility.
- High-pressure cleaning (every 3 years).
